Coaching Philosophy:

As a coach I believe that we are guiding these skaters to be successful individuals first and skaters second. Sport regardless of its nature has so much to offer. Camaraderie, the ability to cope with failure and success, to be positive of their self image, learn about nutrition and the importance of leading a healthy lifestyle. I believe in teaching skating skills properly from the very beginning so that skaters can succeed throughout their skating career. As a skater progresses the skills become more difficult therefore good basic skating skills, hard work and perseverance in a team environment will get you further all while having fun!
